Editors comment:

Please accept this manuscript after minor correction as indicated in the attached revised manuscript as well as please send to author to clarify what they meaning with mean in all Tables, as well as they must be revised the statistical analysis where SD value is very high.

Authors feedback:

Hope you will be fine and having good health. All the corrections have been made according to your suggestion. According to the previous reviewer suggestion Means values of the treatments incorporated but according to my knowledge no need of means values if there LSD Values given. On your recommendation I also check the SD value and rewrite. Hope you will be agreed with me.
