Editor’s Comment:

Thank you very much for your mail. I have checked the revised manuscript as well as the review comments of the referee. Hence, I have following observations:

1. The author does not revise the Methods according to review comment of Zijian Li.

2. In conclusion section, Zijian Li suggest to add some references. However, the author does not add any reference.

3. Padet Siriyasatien suggests that Photo A-D should change to Figure and re-numbering the Figure but authors do not change it. The author just replaces A-D by 1-4.

Therefore, I suggest to revise the manuscript again and thereafter it will be accepted.
