

Editor's Comment:

I have gone through the manuscript (Ms_AJB2T_34066) and also the reviewers comments. The author has made the corrections pointed out by the reviewers.

I have also pointed out some small corrections in the revised manuscripts (red in colour).

I have noted that 2-3 similar works in the same plants palmyra, cow pea and moringa have been done in the same laboratory I think by the same authors with a little difference. However, the present work aims for the children under 5.

Since, both the reviewers accepted the manuscript after minor corrections which were also rectified and justified by the author; I also give the acceptance for publication.

I attach the revised manuscript with few minor corrections made by me.
