SDI Review Form 1.6

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>Abstract and Introduction:</b> Well described</p> <p><b>Materials and methods:</b></p> <p>1) Please include a list of chemicals used and the names of manufacturer as well.</p> <p>2) It is important to write down the equations of certain methods instead of general expression. It's more scientific. For example,                      Weight loss could be written as,  <math display="block">\% \text{Weight loss} = (\text{Initial weight} - \text{Final weight}) / \text{Initial weight} \times 100</math></p> <p>3) What kind of statistical analysis has been done? In the discussion section, it is mentioned that results are significantly different but there is no table of data to show the significant difference or indifference. Also, it is necessary to show the standard deviation to know how close the data are.</p> <p>4) What is the replication number for the experiments?</p> <p><b>Result and Discussion, Conclusion:</b> Well written. But need to do include statistical analysis to justify the discussion.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
