[SDI Review Form 1.6](#)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Micro-Panel Data Evidence from Amhara Region</p> <ul style="list-style-type: none"> • The title of the research " Empirical Analysis of the Relationship between Poverty and Growth in Ethiopia" needs to be restructure to be economic growth not just growth. • Author needs to summarize the abstract to encapsulate important indexes. <ul style="list-style-type: none"> ❖ The sentence in the abstract needs to be re-aligned to make more sense. "<i>The FEM estimation results of this study indicated that growth in average expenditure per capita of a household and change in inequality has a negative and significant and positive significant effect</i>" ❖ The objective of the study should be clearly specified and separated from the introduction of the study. ❖ The second paragraph of the introduction need to be reference to ascertain the source of data quoted, ❖ Among the theories reviewed in the literature, author needs to adopt a theory as a theoretical framework of the study. ❖ The parameter of the estimate of LnGc is .4140 while the estimate of the standard error is 0.2480 which is more than ½ of the Parameter hence indicate a larger standard error of the parameter. The Author should further state the rationale for otherwise interpretation. ❖ The author should clearly state the type and sources of data used. E.g. time series, cross section, panel data etc in the body of the work not only in the abstract ❖ Variance decomposition of each of the explanatory variable to show distinctive relationship of the individual explanatory variable with the endogenous variable is advised. 	

SDI Review Form 1.6

	<ul style="list-style-type: none">❖ The literature review should further be boosted to encompass the nature of poverty, caused of poverty according to literature with particular relevance to the case study.❖ A geometric nexus between poverty and growth is advised.❖ Since the author is dealing with empirical studies hence analytical aspect of the study will need to be boosted and more technical.	
Minor REVISION comments		
Optional/General comments
