

Editor's Comment:

The authors have incorporated the corrections as suggested by both the reviewers into the manuscript.

The research work conducted is significant from ecological point of view in the context of Integrated pest management. Hence, the manuscript can be accepted for publication after the making the following minor revisions.

- 1 .The word "bionomics" has not been mentioned in the abstract section. Please include the term.
- 2 Please provide the year after the name of the person when the species was first discovered i.e. (Stephens, year) as per ICZN. Please make necessary corrections wherever necessary
