SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>Authors need to be more careful, as the lack of line numbering makes revision extremely difficult.</p> <p>In general, the article is repetitive, poorly written and poorly structured. For example, in section 3.1.2 (Flowering) Is each line a paragraph?</p> <p>Many parts are not meant for punctuation errors. For example, first paragraph in section 3.2.1</p> <p>The introduction is poorly structured, some paragraphs are very short and English needs to be improved</p> <p>The authors cite coloration as a morphological attribute (?). Figures 1, 2 and 3 are not of sufficient quality to be published.</p> <p>A MANOVA is more efficient at comparing morphological attributes.</p> <p>The authors fail in their ability to summarize and provide only the essentials of the work.</p> <p>The results are extremely exhaustive. Figure 7 does not have quality for publication. Conclusion needs to be modified</p>	
<u>Minor</u> REVISION comments	<p>"<i>A. clavatus (Anacyclus clavatus)</i>, belonging to the Asteraceae family and the genus <i>Anacyclus</i>" (of course!!!)</p> <p>Table 4 should be supplementary material</p>	
<u>Optional/General</u> comments
