

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">Asian Journal of Biology</a>
Manuscript Number:	Ms_AJOB_39625
Title of the Manuscript:	Haemoparasites of Bovine Species Slaughtered In Port Harcourt Metropolis, Rivers State, Nigeria
Type of Article:	Original Research Article

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I would like to thank the author (s) again because he try to correct the data but unfortunately, the work is still not enough due to the following points:</p> <ol style="list-style-type: none"> <li>1. The design of the study is still not clear, the data not informative and not of public interest</li> <li>2. Materials and Methods: The authors used two types of blood films one of them is the thick blood film which not recommended for diagnosis of intra-erythrocyte infection like Theileria and babesia.</li> <li>3. Results: Anaplasma is not a parasite now. The Authors carried out some statistical analysis but there are some mistakes in the tables e.g. the total samples from each area was 35 (table 1) while in table 2 the first area has 45 samples and 30 per each other. And now simply he corrects the numbers????</li> <li>4. The results not clear at all and no species identified while they said that they identified the species morphologically.</li> <li>5. The discussion and conclusion are not clear.</li> <li>6. The work is not sufficient for international publication and lack in novelty.</li> <li>7. The English language not suitable for scientific research paper.</li> </ol>	

**Reviewer Details:**

Name:	<i>Amira Elhosary</i>
Department, University & Country	<i>Faculty of Veterinary Medicine, Assiut University, Egypt</i>
