

Editor's Comments

There are some mistakes could be found.

Please correct.

Author's feedback

1. Pyridine is weak base or strong base? Check again.

Thank you for this comment. Although pyridine is a strong organic base, I realize the confusion this statement presents hence the word strong has been deleted in the current manuscript and the sentence now reads: **Pyridine, an organic base, destructs** the hydrogen bonding in 1,5-bis(2-hydroxybenzaldehyde)dithiocarbohydrazone making it decompose via the indicated mechanisms.

2. Punctuation error. Put comma after therefore.

The statement has been corrected as suggested

3. Journal name should be written in either full name or abbreviated name. But not mixture of both.

This has been corrected in the manuscript for all the references
