PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. Material and method should be rewritten. I think, this research was carried out in the petri dishes and nursery experiment. -How the two works were done and which parameters were examined? -How were the pre-treatment applications done? How many degrees cold water was applied, which hormone was dosed and for how long? -The investigated parameters how are they calculated (eg germination energy index) must be clearly written in manuscript or supported by the literature.</p> <p>2. The results of Variance Analysis should be given in the text. It is not clear which factors are important (provenance, pre-treatment or provenance x pre-treatment). The Duncan lettering should be made according to the materiality levels.</p> <p>3. There are too many punctuation mistakes in manuscript</p> <p>4. References should be re-audited.</p>
