

SDI Review Form 1.6

| | |
|--------------------------|--|
| Journal Name: | Asian Journal of Research and Reports in Urology |
| Manuscript Number: | Ms_AJRRU_42522 |
| Title of the Manuscript: | Abdominal Compartment Syndrome: A rare but fatal complication of Percutaneous Nephrolithotomy |
| Type of the Article | Case Report |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|--|
| Compulsory REVISION comments | The authors present a case of a patient with lithiasis in the lower calyceal pole of the right kidney. A mini PCNL was performed and the patient developed an Abdominal Compartment Syndrome. It was not clear if the patient became stone free. English in the text needs to be improved. | |
| Minor REVISION comments | The authors present a case of a patient with lithiasis in the lower calyceal pole of the right kidney. A mini PCNL was performed and the patient developed an Abdominal Compartment Syndrome. It was not clear if the patient became stone free. English in the text needs to be improved. | |
| Optional/General comments | | |
