PART 1: Review Comments

<table>
<thead>
<tr>
<th></th>
<th>Reviewer’s comment</th>
<th>Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compulsory REVISION comments</td>
<td>Abstract: Conclusion section. The authors stated the positive effect on remineralization, but there is no result on this point.</td>
<td></td>
</tr>
</tbody>
</table>
| Minor REVISION comments       | Bacterial names in some pages are not italic.  
Abstract: Results section. First sentence has no subject.                                                                 |                                                                                                                                  |
| Optional/General comments     | “Group 5” in Table 1 is expressed as “Commercial group” in Fig.4 and 5.            |                                                                                                                                  |
