Journal Name: British Journal of Applied Science & Technology
Manuscript Number: Ms_BJAST_32846
Title of the Manuscript: THE EFFECT OF HEAT INPUT ON THE MECHANICAL AND CORROSION PROPERTIES OF AISI 304 ELECTRIC ARC WELDMENTS
Type of the Article: Original Research Article

General guideline for Peer Review process:

This journal’s peer review policy states that NO manuscript should be rejected only on the basis of ‘lack of Novelty’, provided the manuscript is scientifically robust and technically sound.

### Compulsory REVISION comments

- The methodology adopted to study the corrosion performance of the welded AISI 304 samples was not discussed in the methods sections. The justification for the study is based on the need for knowledge on corrosion performance of the study material. Normally, one would expect more efforts to dwell/focus on this issue. However, unfortunately, this is the very issue that is lacking in the methodology.

- Also, author(s) did not review Chennaiah et al. (2015) and Bodude & Momohjimoh (2015). Why? These references should also be reviewed.

### Minor REVISION comments

- It will be better if author(s) could provide more details on British E08 standard, possibly with schematic diagrams.

### Optional/General comments
