Editor’s Comment:

A comment by one reviewer regarding "Scale that is used in the study whose validity and reliability not mentioned in the paper" was not properly corrected.

I suggest the author to mention in the methodology section the type of instrument (questionnaire) whether it was self-developed or standardized questionnaire (if standardized questionnaire, the name of the questionnaire, the original author and year should be mentioned and its previous reliability should be specified).

Author’s Feedback:

I write to show my deepest gratitude towards this journal. It has been a fruitful experience and has really enhanced my research competence. The comments and the counter corrections have been very enriching as far as this paper is concerned. You have really enhanced the quality of this paper.
