

Editor's comments:

Along the same line, the current revision still loaded with tracking marks and side comments. The version ("v3") should have interval editing shown in yellow highlights only, per the journal's requirements

Formatting of the paper should be done according to the journal's (BJMMR) requirements re: listing of authors, affiliations, list of abbreviations, etc. in the paper

Authors' feedback:

Tracking marks and comments have been removed.

I am not quite clear on the interval editing.

List of authors, affiliations and list of abbreviations have been included.

Thanks. I await your clarification on interval editing.

Please find attached a more currently revised paper .
