Journal Name: British Journal of Medicine and Medical Research
Manuscript Number: Ms_BJMMR_30340
Title of the Manuscript: Diagnosis of Urological Cancer by 1H NMR based Metabonomics Urinalysis: a Pilot Study
Type of the Article: Short Research Article

General guideline for Peer Review process:

This journal’s peer review policy states that NO manuscript should be rejected only on the basis of ‘lack of Novelty’, provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**PART 1: Review Comments**

<table>
<thead>
<tr>
<th>Reviewer’s comment</th>
<th>Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</th>
</tr>
</thead>
</table>
| **Compulsory** REVISION comments | Background: the use of non invasive techniques in cancer diagnosis is promising and is and actual relevant topic  
To my knowledge, cystoscopy does not require anesthesia or hospitalization in most of the centres  
As is commented in the manuscript, the sample is small, which affects the validation of the model. Nevertheless, the method look promising, I would just add “further studies with larger samples are needed” |
| **Minor** REVISION comments | In the line 12 a word like without is missing “without invasive procedures”  
In the line 68 I would change clinics for clinical |
| **Optional/General** comments | |
