SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Compulsory REVISION comments	I applaud the authors on tackling a difficult topic. The authors have limited themselves to the field of psychology. This article contains information that is pertinent to all fields of medicine and I would like to see the authors change their take on the paper so that all fields understand its importance. A main concern that I have is lack of differentiating between mentor, teacher, supervisor, and leader. I am not sure that there are many differences, but this may be important in the growth of junior professionals. This sounds like servant leadership. I am interested in the authors response to the question of the doctor as servant leader.	
Minor REVISION comments	Many grammatical errors that must be corrected.	
Optional/General comments	This is an important paper that must be taken to the entire field of medicine. This is not just limited to the field of psychotherapy.
