PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Changes make the revised paper much clearer in content and effect. There are grammatical errors that must be addressed. What is not clear from the paper is the difference between supervisor and mentor. What are the differences, if any? How do these affect the relationship that you describe? Also, it sounds like the supervisor is also being "treated." Is this your intent? What is the progression of a supervisee to supervisor (with increasing responsibilities?) This type of paper is important across the medical fields and, hopefully, will reach the larger audience. Good job!</p>
