**Editor's Comments:**

I have noted improvement in the manuscript. The author should implement the following outstanding issues:

1. Provide reference/sources to information in Study Area section
2. Provide a map of the Study area
3. Improve on grammar in section 2.4

Upon implementation, the paper can be considered for publication.

**Author's Feedback:**

1. Reference in the study area section has been given.
2. Map of the study area has been provided.
3. In section 2.4 new line has been added.
