Journal Name: International STD Research & Reviews
Manuscript Number: Ms_I-SRR_33236
Title of the Manuscript: Burden of gonorrhea and trends in antibiotic susceptibility pattern of Neisseria gonorrhoea in Bhutan over four years (2012-15)
Type of the Article: Original Research Article

General guideline for Peer Review process:
This journal's peer review policy states that NO manuscript should be rejected only on the basis of 'lack of Novelty', provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:
### PART 1: Review Comments

<table>
<thead>
<tr>
<th>Reviewer’s comment</th>
<th>Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Overall the paper is very interesting and useful for researchers in its field since it is a novel study and adds to the growing body of evidence regarding gonococcal susceptibility patterns.</td>
<td></td>
</tr>
</tbody>
</table>

**Compulsory REVISION comments**

- The authors should seek the assistance of a language editor to improve the overall quality of the manuscript.
- All line graphs should be converted to vertical bar graphs for ease of reading.
- Please check the manuscript for grammatical error especially language.

**Minor REVISION comments**

- Reword the caption on table 1 to read as follows:
  - “Association between age and gonococcal infection”

**Optional/General comments**

**Reviewer Details:**
