**PART 2:**

| FINAL EVALUATOR'S comments on revised paper (if any)  | Authors' response to final evaluator's comments  |
|---|--|
| I have re-read the revised manuscript and cannot give the paper a higher grade than that previously awarded. The authors have chosen to ignore the comments made in my initial review. Interestingly, they have added commentary to the already lengthy text. I still think the Introduction should be more focused and the Discussion shortened. | The introduction is now more focussed and the discussion segment now shortened as requested. |
