Editor’s Comment:

The manuscript entitled; Short Term Outcome of Malaria at Rwanda Level 2 Hospital Bria in Central African Republic: A Cross-sectional study

Was well written. It should be accepted for publication. However, frequency such as 102 participants should not be used to begin a sentence. The other errors are very minor. Specific study was reported by reference 12 is inappropriate. It should read reported by Fernadez et al. That is the author’s twelfth reference.
