Editor’s Comment:

Concerning to paper 2016_JABB_27901, my perspective is that the reviewers were write in their criticism. Besides, my oppinion is that the authors made a significant effort to improve the paper. Nevertheless, their last answer was not very polite. Nevertheless, according to my point of view, although the paper is not a key one, might have some interest to readers so, it can be published in the present form.
