Editor's comments:

Please see the attached paper with comments. The paper still needs some minor correction/clarification. Since the revision is minor, it should be done pretty quickly.

Author's Feedback:

1. Tenseness has been replaced with mental or nervous strain however the word “tenseness” exists which is a state of mental or nervous strain: high strong taut.
2. feed for livestock, have been removed
3. Pancreatic alpha amylase was employed in this study therefore alpha amylase from Aspergillus oryzae have been replaced with pancreatic alpha amylase.
4. All missing units on the x-axis have been included.
5. Comma has been placed after glibenclamide.
