**Editor’s Comments:**

Based on the reviewers’ comments, to me it seems the author has not corrected the manuscript for English and grammar. Moreover, author has not at all followed the pattern for writing references. It needs a revision for language.

**Author’s Feedback:**

We considered the editor’s comments in the revised manuscript, and the changes in the revision were in red color, as follows:

- The grammatically, formatting, and spilling errors were corrected. However, the proofreading was done by other English speaking colleague.

- The references were written according to the general guideline for authors indicated in [www.sciencdomain.org/journal/12/authors-instruction](http://www.sciencdomain.org/journal/12/authors-instruction), and according to the 1349769084-SDI-paper-template-2003.doc[compatibility Mode]–Microsoft Word.
