**Editor’s Comment:**

I would like to inform you that I gave the authors chance to correct all mistakes in the paper, but one important thing they forgot to do, which is editing and proofreading for the article. They don't know how to separate between sentences, capital letters in the begging of the sentences, full stop, etc...
Also, the numbers less than 10 should be written as words.

Therefore, my decision is giving them the last chance for editing and proofreading for the manuscript.
