Journal Name: Current Journal of Applied Science and Technology  
Manuscript Number: Ms_CJAST_37063  
Title of the Manuscript: The Effects of Boric Acid on Fiberboard Properties Made from Wood/Secondary Fiber Mixtures: Part 4. Insulation Properties of Boards  
Type of the Article: Short Research Article  

**General guideline for Peer Review process:**

This journal’s peer review policy states that **NO** manuscript should be rejected only on the basis of 'lack of Novelty', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

**PART 1: Review Comments**

<table>

| Abstract  
  • Should provide the summary of the article. The first paragraph should provide the introduction regarding the properties that are being studied that is acoustic properties and thermal properties.  
  • endothermic peaks at 71°C (needs correction)  
  Line 20-21 - researchers have already reported that panel products from secondary fibers appropriate properties, often more advantageous than synthetic fibers [2-6].  
  (Reconstruct the sentence. I believe that the author was trying to tell that the secondary fiber properties offers more advantages …)  
  Line 79 – Use better resolution for the equation.  
  Line 97 - boards made from equal proportion of wood and secondary OCC (spelling mistake)  
  Line 168 - samples were more less similar shape (spelling mistake)  
  Line 175 - which is any undesired situations (spelling mistake)  
  Line 177 - considered a very suitable sound absorption material and with having low environmental impact.
