| <p>The aim of this study to evaluate the level of biofilm expression in <i>Klebsiella pneumoniae</i> exposed to Herbal Drugs. The presentation looks good. All errors were corrected. Results are good under this aim. The methodology is still weak for publication. But it can be disregarded that researchers still work for further studies. Based on its scientific merit, I can most kindly recommend this paper to be published as a short communication. But if it is not possible, it can be publish as reseach paper.</p> |   |
