The work done by authors is of significance in today's scenario as dengue fever is on continuous rise at the global level. There is a need to spread awareness about dengue among individuals as there is a low prevalence of sufficient knowledge about transmission and prevention. Further, any misconception about dengue, prevalent in the masses needs to be taken care of. Thus, assessment of the knowledge and attitudes among general population regarding dengue is highly valuable.

The authors have responded to all the queries raised by the reviewers and corrections have been incorporated in the manuscript. However, there are minor corrections which need to be incorporated.

Line No. 21-23: Grammatically incorrect
Line no. 22: The species ‘aegypti’ and ‘albopictus’ should start with lower case.
Line No. 209: Grammatically incorrect
Line No. 439: Grammatically incorrect
Line No. 521: Grammatically incorrect

**Decision:** The manuscript can be accepted for the publication in the journal after incorporation of above correction.
