PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|--|
| Compulsory REVISION comments | | |
| Minor REVISION comments | The title is a brief phrase that describes the contents of the paper. The abstract is informative and completely self explanatory, briefly presents the topic and states the scope of the experiment. The introduction is brief and limited to the definition of the problem. The working hypothesis is clearly stated. Materials and methods include relevant details on the experiment design and techniques so that the experiment can be repeated. The results should be arranged and presented in more ordered and obvious manner. The discussion interpret the findings in view of the results obtained. Generally the manuscript is acceptable after handling the presentation of results | |
| Optional/General comments | | |
