

SDI Review Form 1.6

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_41815
Title of the Manuscript:	The expression of Human Epididymis Protein 4a (HE4) in the normal gastric epithelia and its role in the development of intestinal metaplasia and gastric cancer
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>In this study, the authors tried to investigate the expression of HE4 in normal gastric epithelia, the cells of intestinal metaplasia and gastric carcinoma in order to estimate the role of HE4 in the development of IM and gastric carcinogenesis.</p> <p>However, this manuscript needs more revision as below:</p> <ol style="list-style-type: none"> 1- Please, there is confusion between group 1 and group2 i.e. You use group one as IM group and sometimes as adenocarcinoma group and vice versa. 2- Complete immunohistochemistry procedure. 3- Where is the group that represents normal tissue examination in your study as you planned in the aim of the study? 4- If you used mean you should use SD and if range you should use median. 5- Please revise the English language especially for the discussion section. 6- Please revise the number of pT1 in table 1 7- What your explanation that higher HE4 expression is correlated inversely with tumor invasion? 8- Conclusion is not fully coherent with the results and discussion. 	
Minor REVISION comments		
Optional/General comments
