

Editor's Comments:

There are some problems for publication.

1. Figure 2. B: According to the figure legend, this is x600 as A and C.

However, this figure shows low magnification and poor quality at a glance.

Please provide a higher magnification with good quality picture.

2. Figure 2. E: This picture was overexposed with poor quality for publication.

Please provide a good quality picture.

3. English editing should have been done.

Author's feedback:

Thank you for your comments.

1. , 2. I replaced the microscopic photos B. and E. from Fig. 2 on the photos, which have the best resolution.

3. American Journal Experts edited the manuscript.
