Type of the Article	Case Report

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>In the discussion:</p> <p>Most CBT are asymptomatic at the initial presentation (from 60 to 90%). Cranial nerve dysfunction initially is exceptional.</p> <p>Conventional angiography is rarely used and the imaging technique of choice is CT angiography.</p> <p>Tumour recurrence is rare. In our series of 215 cases, we only had 2 benign and 1 malignant local recurrence (Journal of Cranio-Maxillo-Facial Surgery 2017;45(9):1472-77). In the current case the possibility of a malignant recurrence should have been discussed.</p>	
Minor REVISION comments	It is a very unusual case report and I recommend its publication with the suggested corrections.	
Optional/General comments
