Editor's Comment:

I do think that the paper needs correction in language especially writing the references in text, grammar, and punctuation. The first letter in any month should be written a capital letter not small. The authors have to revise the position of reference [19] line 245 and reference [20] line 231, should be rearranged. Reference 42 in the list of references is not cited in text and should be omitted.

This paper should be written according to the Journal template.

*The manuscript should not be published before doing the necessary corrections given in the attached copy.*
