Editor's Comment:

I corrected the methodology to the methods, and Authors changed again to the methodology. It is error. Methodology is the systematic, theoretical analysis of the methods applied to a field of study. -logy is a suffix in the English language a combining form used in the names of sciences or bodies of knowledge.

The statistical proof is not clear (the reader has to check difference among values, and see your article aim), but you can leave it as it is.

I accept this article.
