Editor's Comment:

The paper is good and should be published. I have little concern on listing & citing a few references, and as following:

1. The author needs to state the **exact vertical depths** where samples were taken, it is under Line 66 Sample Collection
2. Cite reference under line 72 Sample Treatment
3. Cite a reference line 94 Data Analysis
4. At line 150 reference should read as Wuana and Okieimen, 2011; not the Wuana et al., 2011 **(only two names in reference listed at line 253)**
5. AND also make sure references on lines 205, 243, and 248 are also cited?
