Editor’s comments

I have little concern on listing & citing a few references, and as following:

1. The author needs to state the exact vertical depths where samples were taken, it is under Line 66 Sample Collection
2. Cite reference under line 72 Sample Treatment
3. Cite a reference line 94 Data Analysis
4. At line 150 reference should read as Wuana and Okieimen, 2011; not the Wuana et al., 2011 (only two names in reference listed at line 253)
5. AND also make sure references on lines 205, 243, and 248 are also cited?

Author’s feedback

All the authors cited are referenced. All corrections effected.
