Editor's Comment:

I think that the paper “Monitoring urban expansion directions in 6th October City, Egypt using Remote Sensing and Geographic Information System Analysis” can be accepted for publication in the current version.

Nevertheless, I suggest changing the title as: “Monitoring urban expansion directions in 6th October City, Egypt, using Remote Sensing and Geographic Information System Analysis” or better “Monitoring urban expansion directions in 6th October City (Egypt) using Remote Sensing and Geographic Information System Analysis”.

I would like to thank the authors for submitting the paper to the Journal of Geography, Environment and Earth Science International.
