[SDI Review Form 1.6](#)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	No compulsory revision is required for the manuscript.	
Minor REVISION comments	I would like to suggest that the "Assertiveness" of the topic be relaxed a little bit. Since the results and findings in the manuscript have not been widely acclaimed by the scientific community, I would rather suggest a revision in the topic as follows "An Indication of Intentional Efforts to Cause Global Warming and Glacier Melting"	
Optional/General comments	The manuscript is well articulated, scientifically robust and technically sound. The methodology employed is sound and well-known. The results were well discussed.
