Editor’s comments:

1. The manuscript needs some typo-logical error.
2. Also I would appreciate if author would make some indication of the methodology in the abstract.

Author’s feedback:

We examined the manuscript to insure there were no typographical errors. We extended the Methods section in the text and within word limitations extended the Methods section in the abstract. We further added a paragraph lines 319-323 that supports our observations with a different tree in a different place. We added one more word to the title for clarity. All new changes are shown in pink highlight.
