Editor’s comment:

My decision is "minor revision."
Here are my comments for minor revision.
1. Authors must follow our template.
Our style is as follows (http://www.sciencedomain.org/page/general-guideline-for-authors).

Aims:

Study design:

Place and Duration of Study:

Methodology:

Results:

Conclusion:

2. Figure 1 should be revised. Legend is not clear.

3. Location should be shown in figures. In the world map for country and in the local map for the university should be provided.

Author’s feedback:

No. 1: I have arranged the paper as per the subtitles (Aims, Study design, Place and Duration of Study, Methodology, Results and Conclusion)

No. 2: Figure has been revised. The different portions have been given different colours for greater contrast hence more clarity

No. 3: The map showing the location of the study are has been added.
