**Editor's Comment:**

Though the article entitled, “Microbial Response to Varying Concentrations of Crude Oil Pollution of Agricultural Soils in Ondo State, Nigeria” has been improved a lot as the authors have acted up on many comments and suggestions of the reviewers. However, authors have not cited the references as per the format of the journal. Even there is no uniform pattern of citing the references in the text as well as in the reference list. Before accepting the manuscript authors may be asked to make these corrections.
